B-Tech launch range of universal LED mounting solutions

Award-winning AV Mounts manufacturer B-Tech has responded to growing demand for hassle-free mounting of today's LED panels with the launch of a new universal LED mounting range.

With ever-decreasing pixel pitch and improving image quality, LED panels are now a popular option to traditional video walls for large-scale displays. B-Tech have brought a solution to market that is simple to specify, with fast turnaround times from off-the-shelf stock. Designed to work with the most popular LED panels on the market, B-Tech's LED mounting solutions can be specified to requirement using B-Tech's online LED configuration tool – available via www.btechavmounts.com/led-panel-configurator

Using renowned System X technology at its core, the new range can be ordered for wall mounting, mobile and fixed base applications. Using off-the-shelf components means that solutions can be packaged and shipped promptly, with B-Tech staff pre-assembling all key components to save installers valuable on-site time.

Range and key features at a glance:

BT9340 Direct view LED video wall mount

- Suitable for front service or rear access panels
- Silver aluminium
- Universal design suitable for variety of LED panels and configurations
- System can be extended to any required width for large installations

He adds: "We have worked closely with several key manufacturers of LED to produce this new range. The AV industry has been crying out for a hassle-free mounting solution as LED becomes the popular choice for large scale digital signage. Using System X components brings simplicity to any install and our universal LED mounts are no different. Our online configurator makes it easy to specify requirements, resulting in one single part code and fast order fulfilment from off-the-shelf components."
