Ø50mm (2") Pole End Ring

For Use With BT7850 Poles

Installation Guide

Do not attempt to install this product until all instructions and warnings have been read and properly understood. Please keep these instructions for future reference.

Please check carefully to make sure there are no missing or defective parts - defective parts must never be used.

B-Tech AV Mounts, its distributors and dealers are not liable or responsible for damage or injury caused by improper installation, improper use or failure to observe these safety instructions. In such cases, all guarantees will expire.

The BT7057 pole end ring creates a neat appearance at either end of any B-Tech BT7850 (Ø50mm) pole. The ring is quickly and easily fitted by means of a tight and secure push fit.

This ring also doubles up as a cable protector against the rough edge of hand sawn poles upon cutting to length during installation.

The Pole End Ring has a diameter 44mm (1.7") hole to allow most cables and connectors to easily pass through.

The Pole End Ring fits onto a B-Tech 50mm (2") pole even when a BT7052 collar, including covers, is attached and with the safety bolt in place.

To use the larger BT7051 collar, new safety bolt holes must be drilled at least 27mm from the end of the pole to allow the Pole End Ring to fit on.
