Video Wall Versatility

Introducing the BT8311 Professional Video Wall Mount

Following the worldwide success of its BT8310 pop-out video wall mount, B-Tech has released its latest mounting solution – the BT8311.

It is an extremely versatile product, which can mount screens in landscape or portrait format for any number of applications.

As well as being excellent for wall-mounted video arrangements, the BT8311 is compatible with B-Tech's modular collar and pole system.

This allows it to be used to create impressive pole mounted video wall structures in an endless variety of configurations.

Additionally, the BT8311 can be used to create perfectly aligned banks of information screens or menu boards.

Many features have been included for user convenience, all of which are designed to make installation quick and easy. These include eight point micro-adjustments, cable management and B-Tech's easy installation spacer system.

The eight point micro-adjustment enables screens to be perfectly aligned - quickly, easily and without the need for tools.

The re-usable screen-specific spacer system helps reduce installation times by cutting out the need to measure and mark out the location for every mount in the install.

The BT8311 has been designed so that installs containing both the BT8311 and BT8310 are possible. This means the pop-out function of the BT8310 can be used at select positions to allow access to the micro-adjustment knobs of every screen.

This is a great way to assemble large, wall-mounted video walls at an affordable cost and will allow continued access to the micro-adjustment, making installation and continued servicing of the screens extremely easy.

Matt Bennett, Managing Director of B-Tech, said: "Video walls and digital signage continue to be an important area for B-Tech and we expect the versatility of this new product to open up opportunities in several areas of the industry."

Align Every Mounting

Published: Monday, August 11, 2014

Following up on the worldwide success of its BT8310 pop-out video wall mount, B-Tech has announced the release of its all-new means to mounting: the – goes one louder – BT8311.

An extremely versatile product which can mount screens in landscape or portrait format for any number of applications, as well as being excellent for wall-mounted video arrangements, the BT8311 is compatible with B-Tech's modular collar and pole system, allowing it to be used to create impressive pole mounted video wall structures in an endless variety of configurations. Additionally, the BT8311 can be used to create perfectly aligned banks of information screens or menu boards.

Many features have been included for user-convenience, all of which are designed to make installation quick and easy; these include eight point micro-adjustments, cable management and B-Tech's easy installation spacer system.

The eight point micro-adjustment enables screens to be perfectly aligned – quickly, easily and without the need for tools. The re-usable screen-specific spacer system helps reduce installation times by cutting out the need to measure and mark out the location for every mount in the install.

The BT8311 has also been designed so that installs containing both the BT8311 and BT8310 are possible. This means the pop-out function of the BT8310 can be used at select positions to allow access to the micro-adjustment knobs of every screen. This is a great way to assemble large, wall-mounted video walls at an affordable cost and will allow continued access to the micro-adjustment, making installation and continued servicing of the screens extremely easy.

Matt Bennett, Managing Director of B-Tech, said: "Video walls and digital signage continue to be an important area for B-Tech and we expect the versatility of this new product to open up opportunities in several areas of the industry."

Premium Video Wall Mounting Solutions

Save time and money with B-Tech's modular mounting systems

BT8310

Pop-In, Pop-Out Video Wall Mount

Shorten installation times with B-Tech's pop-in, pop-out mounting solution and reusable spacer system. The BT8310 can mount screens in both landscape and portrait configurations and features 8 point tool-less micro adjustment to seamlessly align screens quickly and easily.

Modular Freestanding Video Wall Mount

Fast-fit connectors and a clever modular design means BT8350 installations are quick and easy - perfect for temporary or rental video walls. Anything from a 2x2 to 70x7 is possible and one BT8350 kit can be used in multiple configurations (a 3x3 setup can be used in 14 different arrangements). Castors, a bolt down kit and flying frame adaptors are also available.

BT8350

BT8351

Pop-In, Pop-Out Freestanding Video Wall Mount

Combining all the great features of both the BT8310 and the BT8350, the BT8351 allows access to screens for servicing and maintenance no matter where your video wall is positioned.
