B-Tech - standing out

B-Tech AV Mounts has rolled out a new trolley designed to support larger screens such as 84" and 95", which are becoming more readily available in today's market.

And with a weight limit of 130kg, the BT8506 Extra-Large Flat Screen Display Trolley can comfortably support even bigger screens.

Created to satisfy the growing worldwide demand for mobile mounting solutions, the BT8506 is also ideal for latest-generation technologies such as heavy-duty touch screens, which often require sturdier mounts to support them.

Designed by its in-house team at the head office in Daventry, UK, B-Tech's latest product is already proving popular after being previewed at a number of recent trade shows around the world.

For balance and strength, the BT8506 features an extra-wide base which is sturdy and durable, yet doesn't sacrifice any of the stylish qualities which are found throughout B-Tech's range of trolleys.

Despite its size, the base quickly disassembles into three pieces for easy transportation, and re-assembly with the supplied fittings couldn't be simpler.

Two stylish chrome poles support the universal interface which fits screens with mounting patterns up to 1100mm x 730mm.

Added features include adjustment screws which enable the screen to be levelled once mounted, integrated cable management, plus storage space for a laptop, mini PC or digital signage player behind the screen.

Supplied as standard are non-marking 4" locking/braked castors and optional screw-in levelling feet which allow the BT8506 to be used as a stationary floor stand if mobility is not required.

Matt Bennett, MD of B-Tech, said: "This product was designed and made available due to the increasing popularity of large screens - many of them interactive.

"There was a need for this stand to be versatile, reliable, safe and strong, and our design team has created another perfect solution.

"The BT8506 has B-Tech's renowned simplicity of use and despite its necessary dimensions, is easy to assemble/disassemble and to transport."

Компания B-Tech представила новую модель стойки-тележки BT8506, специально разработанной для размещения больших и тяжелых дисплеев с диагональю экрана свыше 65 дюймов. Прочная и устойчивая конструкция стойки выдерживает один дисплей массой до 130 кг.

Удобство в использовании и при монтаже является характерной чертой монтажных решений B-Tech. Универсальный интерфейс стойки BT8506 подходит для размещения любых экранов с системой крепления VESA и pop-VESA до 1100 мм (горизонтально) x 730мм (вертикально). Пьедестал стойки-тележки раскладывается на три части для удобства транспортировки, в каждой хромированной трубе предусмотрено 5 отверстий для скрытой прокладки кабелей. Поставляется в варианте с колесами и блокировочным тормозом или с регулируемыми ножками.

Строгий и стильный дизайн BT8506 идеально сочетается с современными экранами. Крепление BT8506 предназначено для использования в качестве мобильной тележки, либо как стационарной напольной стойки.

B-Tech Rolls Out New Mounting Solution

British mounting solutions provider B-Tech AV Mounts recently rolled out a new trolley designed to support larger screens such as the 84" and 95". With a weight limit of 130kg, the BT8506 Extra-Large Flat Screen Display Trolley comfortably supports these big screens.

Created to satisfy the growing worldwide demand for mobile mounting solutions, the BT8506 is ideal for heavy-duty touch screens, which often require sturdier mounts to support them.

Designed by B-Tech in-house team, the BT8506 features a sturdy, durable and extra-wide base, yet it doesn't sacrifice any aesthetic qualities. Despite its size, the base can be disassembled quickly into three pieces for easy transportation, and re-assembled with the simple supplied fittings.

Two stylish chrome poles support the universal interface which fits screens with mounting patterns up to 1100mm x 730mm. Added features include adjustment screws which enable the screen to be levelled once mounted,

integrated cable management, plus storage space for a laptop, mini PC or digital signage player behind the screen.

Supplied as standard are non-marking 4" locking/braked castors, and optional screw-in levelling feet which allow the BT8506 to be used as a stationary floor stand if mobility is not required.

"This product was designed and made available due to the increasing popularity of large screens - many of them interactive," said Matt Bennett, MD of B-Tech. "There was a need for this stand to be versatile, reliable, safe and strong, and our design team has created another perfect solution."

Mitsubishi Offers New Slimline Cube For Control Rooms

Launched at the recently concluded InfoComm MEA 2014 in Dubai, Mitsubishi Electric's new 'slimline' VS-60HS12 cube is the latest entry to the visualization market.

Developed using the same unique LED light source technology as its widely-used Seventy Series DLP cubes, the new slimline cube VS-60HS12 provides an elegant solution for large format control room display in restricted spaces such as crisis suites and breakout rooms.

Offering both a near-seamless high-resolution display, zero-maintenance 24-hour operation and compact footprint, the new cube offers significant savings in space requirement and cost of ownership.

Mitsubishi latest 60" diagonal DLP rear projection cubes measure at 520mm deep, nearly half that of Mitsubishi's Seventy Series cubes. Being solely front access, the VS-60HS12 can be installed flush to the wall, with no rear

access required.

The LED projection engine also employs the same patented air-cooled light source technology as Mitsubishi's high-specification Seventy Series, and requires no maintenance over its entire lifespan of approximately 50,000 hours.

Based on a 0.65" Digital Mirror Device (DMD), the display delivers up to 665 cd/m² at 1080p resolution, enhanced by Mitsubishi's patented Colour Space Control and Digital Graduation circuitry. The displays are also completely self-balancing, ensuring correct colour balance across the wall automatically.
