Flush or angled - cantilever arms bring flexibility to new B-Tech screen mount

To meet the ever-increasing demand for wall mounted screen flexibility, leading bracket manufacturer B-Tech has launched a new ultra-slim flat screen wall mount with cantilever arms.

Designed by engineers at B-Tech's UK headquarters in Daventry, the BT8225 brings flexibility to medium to large sized screen installs, with an ultra-slim twin cantilever arm wall mount, tilting interface and three swivel points, allowing quick and easy repositioning of screens as required - whether folded flat to the wall at a depth of just 40mm or at maximum extension.

Cover plates to hide fixings and integrated cable management help make the BT8225 a neat and tidy mounting solution which suits commercial applications as well as home installations.

As well as its versatile flush mounting capabilities, the BT8225 is ideal for mounting screens into the corner of a room and works perfectly in conjunction with B-Tech's BTV914 Universal Soundbar Mount.

For added peace of mind, the screen mount features interface arms that can be fixed with a user's padlock to prevent unauthorised removal of the screen.

Mark Walker, Business Development Manager for B-Tech, said: "Medium and large screen displays in the office are fast becoming a necessity and this new mount is designed to be the best of both worlds – an aesthetically pleasing flush mounted wall mount with the ability to be extended and angled when required.

He added: "We aim to create the most innovative, hassle free and secure mounting solutions for integrators and work closely with them at the design stage to ensure our products meet the needs of the market. Utilising B-Tech's easy to operate tool-less tilt mechanism, we see it as an ideal solution for mounting screens in the workplace as well as bringing total flexibility to home installations."

BT 8225 key features:

- Universal screen interface suitable for all screens
- Ultra-slim design allows close to the wall installation when folded flat
- Twin cantilever arm for extended reach - ideal for corner mounting
- Easy tool-less tilt mechanism
- Lateral adjustment of screen once mounted
- Integrated cable management
- Cover plates to hide wall fixings
- Interface arms can be padlocked to help prevent unauthorised removal of screen (padlock not included)
