B-Tech's ISE Preview

For the tenth year in a row B-Tech will be exhibiting at ISE, presenting numerous recently launched mounting solutions as well as a few old favourites and some newly developed innovations.

With the hugely successful pop-in, pop-out video wall system now available on the excellent BT8350 Freestanding Video Wall Mount, digital signage and video walls will once again be a key area of focus.

Alongside these will be new flat screen mounting solutions such as the Heavy Duty Universal Flat Screen Wall Mount which is designed for screens larger than 65" with weights of up to 130kg.

In contrast to the super size BT9903 is the new ultra-slim BT8221 Double Arm Flat Screen Wall Mount whose sleek design will mount screens up to 65" just 37mm from the wall.

Additionally a Heavy Duty Flat Screen Trolley for extra-large screens and new range of floor stands has also been developed which includes options for mounting screens in a back-to-back format.

Designed by the team at the expanding company, the BT8551, BT8552, BT8553 and BT8554 are the answer to increasing demand for stands that are stylish yet robust.

Also on display will be the BTV914, a universal sound-bar mount, which is designed to mount soundbar speakers to a flat screen TV.

Matt Bennett, Managing Director of B-Tech, said: "ISE is the most important trade show for us in the calendar and this year we have a lot to shout about.

"We have attended every ISE show for the past 10 years and as ISE has developed so have we.

"Almost 45,000 visitors attended last year making it one of the fastest-growing and best-attended shows in the professional AV and electronic systems sector.

"It's also a great opportunity to see what is happening across the AV industry, which is incredibly fast-moving."
