B-Tech bring more to the floor

Leading audio video mount manufacturer B-Tech International has added six new models to its high-end AV furniture range.

With premium high gloss finish and concealed castors, the new models provide a comprehensive choice of quality floor standing mount solutions for single or twin screens in the office or high end residential applications.

The new stands – the BTF830 – BTF835 offer mounting heights from 1.3ms to 1.9m for screens up to 85-inches, with the BTF832 also benefiting from electronic motorised height adjustment.

For the bigger picture, the BTF834 and BTF833 models offer side-by-side mounting of screens sized between 40-55-inches.

Storage of AV equipment, such as Blu-Ray players or a PC, is provided on the BTF835, which features a ventilated shelved storage area with premium fittings to keep additional hardware.

Mark Walker, business development manager for B-Tech International, said: “This new range of stands really do catch the eye. Naturally, they benefit from B-Tech’s hassle-free but exact UK engineering, but it’s the quality of the finish and their aesthetic qualities that stand out. The concealed castors also mean the stands can be used were required – perfect for making an impact in the boardroom or presentation area.”

All of the new floor mounts can be equipped with the BT7870 camera shelf for easy video conferencing applications, with all but the BTF832 also designed to take the BT7869 codec shelf if required.

B-Tech’s range of audio video mounting solutions can be seen at Technology Exposed, Mercedes Benz World, Weybridge, Surrey, on September 16-17. Register here <http://www.technology-exposed.com>
