## B-Tech add ultra-stretch solutions to System X range

AV mounts manufacturer B-Tech has added two new products to its popular System X Range, designed specifically for the latest ultra-stretch display from LG.

LG's 86-inch, 58:9 ultra stretch signage (86BH5C) display is already proving a popular choice with retailers who can mount the screen in a portrait orientation for maximum visual impact with a minimal footprint. It is also ideal as an out-of-the-box menu board in landscape format, drastically saving the installation time and cost of setting up multiple screens and mounts.

B-Tech's continually expanding System X Range once again demonstrates its versatility with the addition of new solutions for mounting the 86BH5C in either landscape or portrait format.

For landscape orientation, the BT9905 mounts the screen at a depth of just 45mm, for a close to the wall installation which still allows enough room for easy access to connectors. For upright mounting, the BT9906 fits the display in portrait orientation, at a depth of just 65mm.

Both mounts come with security screws as standard to help prevent unauthorised removal of the screen and height adjustment screws allow the screen to be levelled perfectly after installation.

Using B-Tech's System 2 poles and collars, pole mounted installs are also possible, allowing mounting of LG's ultra-stretch screen from ceiling, floor, or both if required.

For more details, speak to your B-Tech representative.
