B-Tech expands range of video wall mounting solutions

Having recognised the increasing opportunities throughout the digital signage and video wall markets B-Tech Audio Video Mounts continues to develop its range with the release of the brand new Freestanding Video Wall Mount and updates to the Professional Video Wall Mount.

To match latest developments in screen technology which has seen video wall screens getting lighter and thinner, the BT8310 'Professional Video Wall Mount with Quick Lock Push System' now has lower tension springs included with the product which allow the pop-in, pop-out feature to be used with very little force.

The newest addition to B-Tech's range is the 'Freestanding Video Wall Mount'. Previewed at this year's ISE the BT8350 has been designed for ultra quick installation using captive screws and wing nuts, making it perfect for the rental and exhibition market. Screen specific frames feature 8 micro adjustment points to allow perfect screen alignment. Built from a modular system, the made to order BT8350 is scalable up to 7 screens high with an unlimited width and can be re-assembled in multiple configurations, for example a 4x4 mounting kit can be used in all configurations from 1x2 up to 3x5. A range of accessories are also available for this product such as mobile castors, a bolt down kit and a flying frame adaptor which allows video walls to be suspended from the ceiling.

Please visit www.btechavmounts.com or email sales@btechavmounts.com for more information about the BT8310 and BT8350 video wall mounting solutions.
